

RELEASE V03.01.03 (MAY 2026)

Welcome to **BharatPay Pro**, India's most advanced Payroll Management System. This manual provides detailed instructions for navigating the version 03.xx architecture, specifically the **Multi-Establishment** environment.

1. GETTING STARTED

1.1 Installation & Registration

Upon initial launch, the system binds your identity to the hardware for security.

- **Admin Setup:** Create your master password. This is required for critical actions like database purging and identity restoration.
- **Connectivity:** Ensure daily internet access for cloud licensing synchronization.

2. MULTI-ORGANIZATION MANAGEMENT

Manage multiple companies or establishment units from a single control center. Each unit maintains independent data silos for maximum privacy.

2.1 The Organization Selector

If multiple units are registered, the **Organization Selector** appears post-login. Choose the establishment to load its specific payroll history and employee master.

PRO TIP: If you only manage a single establishment, the system will bypass the selector and load your Dashboard automatically.

2.2 Switching Between Units

Use the sidebar **Company Switcher** to jump between units. This is disabled during active payroll processing to prevent data cross-contamination.

3. STATUTORY COMPLIANCE

3.1 Code Wages & Labor Codes

BharatPay Pro is pre-configured for the 2020 Labor Codes. All calculations (PF, ESI, Gratuity) use the "Code Wages" definition by default, monitoring the 50% exclusion threshold automatically.

4. MONTHLY PAYROLL WORKFLOW

1. **Attendance & Leave:** Capture monthly workdays and leave types.
2. **Advances & EMIs:** Automatic tracking and recovery of employee loans.
3. **Arrears:** Calculate retroactive increments with ad-hoc or percentage-based logic.
4. **Processing:** Generate the monthly payroll stack with one click.
5. **Safety Backup:** A "Safety Snapshot" of your database is created before every major system change.

5. STATUTORY FILINGS & REGISTERS

Generate filings ready for submission to government portals:

- **PF ECR:** Direct Text/Excel format for unified portal upload.
- **ESI Return:** Monthly contribution excel sheets.
- **Labor Registers:** Form B (Wage Register) and Form C (Muster Roll) in statutory formats.

6. TROUBLESHOOTING

- **Clock Errors:** Ensure system time is set to "Automatic" to avoid security lockouts.
- **Restore Points:** Use the local Data backup folder for emergency data recovery.
